PROFESSIONAL SUMMARY

I help brands get found by search engines and AI answer engines — fixing the technical groundwork most sites get wrong, then writing the content that earns visibility once it's fixable. That's backed by a software engineering background and ongoing Computer Science study, giving me the depth to write about technical and web3 products the way someone who's actually built them would. Recent proof: took my own site from a 33% Ahrefs health score and zero Google indexing to 100% health and a Google AI Overview citation in 72 hours.

WHAT I DO

- **SEO / GEO / AEO:** Keyword research and content strategy across search, AEO, and GEO; on-page SEO (metadata, headers, internal linking); technical SEO (schema, canonicals, redirects, Open Graph); off-page SEO and backlink strategy; analytics and reporting via GA, GSC, and GTM
- **Content Writing:** Research-backed blog posts and long-form articles across tech, finance, and web3 — sources verified and compared before writing
- **Technical Writing:** Developer docs, protocol explainers, and product copy, written docs-as-code — version-controlled, reviewed, shipped like code

SKILLS

SEO · GEO · AEO · Keyword Research · On-Page SEO · Off-Page SEO · SEO Content Writing · Content Optimization · Technical Writing

STACK

Ahrefs · Ubersuggest · SEMrush · Google Analytics · Google Search Console · Google Tag Manager · Sanity CMS · Google Docs · Markdown · HTML/CSS/JS · Git · GitBook · ReadMe

SUPPORTING TECHNICAL BACKGROUND

- **Languages:** JavaScript, TypeScript, Python, Solidity
- **Blockchain:** Smart contracts, Ethereum, DeFi, ethers.js, Hardhat
- Founder and full-stack developer of Roomly, a live multi-role SaaS platform for Nigerian university accommodation (Next.js, TypeScript, Express, Prisma, Supabase), including an escrow-backed payment workflow. Also built and tested a flash-loan arbitrage smart contract on a mainnet fork before deploying to Ethereum mainnet.

SELECTED WRITING

SEO Writing

- [brightjasper.com SEO/GEO Case Study](https://brightjasper.com/seo-geo-case-study) — took the site from a 33% Ahrefs health score and zero Google indexing to 100% health and a Google AI Overview citation in 72 hours.
- [How I Fixed Ahrefs 3xx Redirects in Sitemap \(www vs non-www on Cloudflare DNS + Vercel\)](#) — diagnosing and fixing a canonical loop across Cloudflare DNS and Vercel.
- [How I Got a New Domain Indexed in 24 Hours](#) — GSC live testing, sitemap submission, and indexing a brand-new domain.

Content Writing (Tech, Finance, Web3)

- [Dangote Refinery Stock: Why ₦10,000 Is Unrealistic](#) — research-driven breakdown fact-checked against the IPO prospectus and primary financial sources.
- [Recursive zk-SNARKs: How Mina Keeps Its Blockchain Succinct](#) — part of a technical deep-dive series on Mina Protocol's zero-knowledge architecture, sourced against Mina's own documentation and primary cryptography papers.

Technical Writing

- [Roomly Developer Guide: Build on the Student Housing API](#) — practical guide to building against Roomly's proposed API, first request through full dashboard.
- [Build a RAG Pipeline with Node.js and TypeScript](#) — step-by-step tutorial with real error handling.

Archived — Product & Persuasive Writing (past work, not actively pitched)

- Roomly product copy, Noel's Essentials product copy, Roomly founder story — full samples at brightjasper.com/writing-samples

EDUCATION

Bachelor of Technology (B.Tech), Computer Science | *Federal University of Technology, Minna*

- 5-Year Program, Year 3 (In Progress)
